

## TABLE OF CONTENTS

<b>A</b>	<b>Introducing Stata 10 Environment</b>	<b>7</b>
1	File Extensions	7
2	Immediately Following Installation	7
3	Command window	8
4	Results window	9
5	Review Window	9
6	Variables Window	10
7	Viewer Window	11
8	Data Editor Window	12
9	Data Browser Window	13
10	Do-File Editor Window	14
11	Graph Window	15
<b>B</b>	<b>Personalise Stata's Default System Parameters</b>	<b>16</b>
1	System Constants and System Parameters	16
2	Memory Settings	16
3	Output Settings	17
4	Window Interface Settings	18
5	Graphics Settings	19
6	Efficiency Settings	21
7	Network Settings	21
8	Update Settings	22
9	Other Settings	22
10	Reset Factory Settings	23
11	Load Your Defaults Every time Stata Initialises	24
<b>C</b>	<b>Your First Stata Session</b>	<b>25</b>
1	Update	25
2	Learn to Ask for Help and Perform Search	25
3	Other Sources of Help and Support	27
4	Directory Management	28
<b>D</b>	<b>Familiarise yourself with Stata Syntax</b>	<b>30</b>
1	Start with a Simple and Useful Command: <code>count</code>	30
2	Generalised Stata Syntax	33
<b>E</b>	<b>Load, Save, Import and Export Datasets to and from Stata</b>	<b>36</b>
1	First learn how to use <code>use</code> and <code>save</code>	36
2	Import Datasets into Stata	37
3	Export Datasets from Stata	40
4	Create Pseudorandom and other Temporary Datasets	41
<b>F</b>	<b>Review and Document the Dataset</b>	<b>44</b>
1	Understand the Dataset	44
2	Add Detailed Documentation	48
3	Rename and Organise Variables in the Dataset	51

<b>G</b>	<b>Data Structure and Statistical Implications</b>	<b>53</b>
1	Qualitative Variables with Categorical or Discrete Data	53
2	Quantitative Variables with Continuous Data	56
<b>H</b>	<b>What to Do Before You Start Changing the Dataset</b>	<b>58</b>
1	Before Changing the Data Points	58
2	Preserve and Restore	59
3	Learn to Delete Observations and Variables	59
<b>I</b>	<b>Combine and Reorganise Datasets</b>	<b>61</b>
1	Combine Datasets	61
2	Reorganise Datasets	65
<b>J</b>	<b>Change the Dataset</b>	<b>68</b>
1	Introduction to Variables	68
2	Manage Numerical Variables	71
3	Manage String Variables	76
4	Manage Date Variables	80
<b>K</b>	<b>Missing Data and Special Variables</b>	<b>82</b>
1	Missing Data	82
2	Create Dummy Variables	84
3	Create Special Purpose Variables	85
4	Convert Datasets into Summaries	86
<b>L</b>	<b>Validate Expectations and Filter the Usable Dataset</b>	<b>88</b>
1	Validate Claims on Data Structure	88
2	Nonsensical Observations	89
3	Alarming Observations	91
4	Duplicate Observations	95
5	Benefits of Filtering	97
<b>M</b>	<b>Log and Export Output, and Reproduce your Work</b>	<b>98</b>
1	Maintain a Log for Output	98
2	Use Translators to Export Stata Files and Output	100
3	Copy and Paste Output from Stata to Word and Excel	103
4	Make Sure that you can Reproduce your Work	104
<b>N</b>	<b>Other Useful Commands and Expressions</b>	<b>108</b>
1	Stored Results	104
2	The Command <code>display</code>	110
3	Explicit Subscripting	111
4	Some Important Prefixes	112
5	Immediate Commands	114
<b>Bibliographical References and Web-based resources</b>		<b>115</b>
